

Product/Process Change (PCN) Notification

PCN Number: DOC-99851	Contact: Yumi Otokawa	
Date Issued: May 18th, 2020	Title: Manager, Sales Operations	
PCN Effective Date: Aug 18th, 2020	Phone: 1-858-869-0591	
Product(s) Affected: PE42420	Email: pcn@psemi.com	
Sample Availability: May 18th, 2020		
Change Control Board Approval #: CO-26552		
Change Category:		
Wafer Fabrication Process	☐ Shipping/Labeling	
☐ Design/Mask Change	☐ Equipment	
Singulation Process	☐ Material	
Assembly Process	Product Specification	
☐ Electrical Test	☐ Product End of Life	
Purpose of Change:		
Manufacturing (bump) site transfer and Pmax for ter	minated port update	
mandiacturing (bump) site transfer and Finax for ter	minated port appeare	
Description of Change:		
	nSami is transferring DE42420 humn site to LIAT	
1. This is a notification to advise our customers that		
1. This is a notification to advise our customers that from FCI. There will be no change in form, fit and fu	nction of this product.	
1. This is a notification to advise our customers that from FCI. There will be no change in form, fit and fu During the transition from current site to new bump	nction of this product. site, pSemi will continue to support customer	
1. This is a notification to advise our customers that from FCI. There will be no change in form, fit and fu	nction of this product. site, pSemi will continue to support customer	
1. This is a notification to advise our customers that from FCI. There will be no change in form, fit and fur During the transition from current site to new bump shipments with inventory built at either facilities and	nction of this product. site, pSemi will continue to support customer	
1. This is a notification to advise our customers that from FCI. There will be no change in form, fit and fur During the transition from current site to new bump shipments with inventory built at either facilities and	nction of this product. site, pSemi will continue to support customer	
1. This is a notification to advise our customers that from FCI. There will be no change in form, fit and fur During the transition from current site to new bump shipments with inventory built at either facilities and availability.	nction of this product. site, pSemi will continue to support customer does not anticipate any impact on the product	
 This is a notification to advise our customers that from FCI. There will be no change in form, fit and fur During the transition from current site to new bump shipments with inventory built at either facilities and availability. Maximum power into termination Current datasheet has Pmax for terminated port set condition. Updated Datasheet has peak Pmax value 	nction of this product. site, pSemi will continue to support customer does not anticipate any impact on the product as 20dBm CW both the operating max and Abs max	
 This is a notification to advise our customers that from FCI. There will be no change in form, fit and fur During the transition from current site to new bump shipments with inventory built at either facilities and availability. Maximum power into termination Current datasheet has Pmax for terminated port set 	nction of this product. site, pSemi will continue to support customer does not anticipate any impact on the product as 20dBm CW both the operating max and Abs max	
 This is a notification to advise our customers that from FCI. There will be no change in form, fit and fur During the transition from current site to new bump shipments with inventory built at either facilities and availability. Maximum power into termination Current datasheet has Pmax for terminated port set condition. Updated Datasheet has peak Pmax value 	nction of this product. site, pSemi will continue to support customer does not anticipate any impact on the product as 20dBm CW both the operating max and Abs max for terminated port both in operating max and Abs	
 This is a notification to advise our customers that from FCI. There will be no change in form, fit and fur During the transition from current site to new bump shipments with inventory built at either facilities and availability. Maximum power into termination Current datasheet has Pmax for terminated port set condition. Updated Datasheet has peak Pmax value max table as below. 	nction of this product. site, pSemi will continue to support customer does not anticipate any impact on the product as 20dBm CW both the operating max and Abs max for terminated port both in operating max and Abs	
 This is a notification to advise our customers that from FCI. There will be no change in form, fit and fur During the transition from current site to new bump shipments with inventory built at either facilities and availability. Maximum power into termination Current datasheet has Pmax for terminated port set condition. Updated Datasheet has peak Pmax value max table as below. 25dBm (15dBm w/ 10dB PAR) in Operating Ranges to the property of the property	nction of this product. site, pSemi will continue to support customer does not anticipate any impact on the product as 20dBm CW both the operating max and Abs max for terminated port both in operating max and Abs	
 This is a notification to advise our customers that from FCI. There will be no change in form, fit and fur During the transition from current site to new bump shipments with inventory built at either facilities and availability. Maximum power into termination Current datasheet has Pmax for terminated port set condition. Updated Datasheet has peak Pmax value max table as below. 25dBm (15dBm w/ 10dB PAR) in Operating Ranges to the property of the property	nction of this product. site, pSemi will continue to support customer does not anticipate any impact on the product as 20dBm CW both the operating max and Abs max for terminated port both in operating max and Abs	
 This is a notification to advise our customers that from FCI. There will be no change in form, fit and fur During the transition from current site to new bump shipments with inventory built at either facilities and availability. Maximum power into termination Current datasheet has Pmax for terminated port set condition. Updated Datasheet has peak Pmax value max table as below. 25dBm (15dBm w/ 10dB PAR) in Operating Ranges to 28dBm (18dBm w/ 10dB PAR) in Absolute Maximum Ordering code changes: Original ordering codes (FCI): PE42420E-Z; EK42420 	inction of this product. site, pSemi will continue to support customer does not anticipate any impact on the product as 20dBm CW both the operating max and Abs max for terminated port both in operating max and Abs rable Ratings table	
 This is a notification to advise our customers that from FCI. There will be no change in form, fit and fur During the transition from current site to new bump shipments with inventory built at either facilities and availability. Maximum power into termination Current datasheet has Pmax for terminated port set condition. Updated Datasheet has peak Pmax value max table as below. 25dBm (15dBm w/ 10dB PAR) in Operating Ranges to 28dBm (18dBm w/ 10dB PAR) in Absolute Maximum Ordering code changes: 	inction of this product. site, pSemi will continue to support customer does not anticipate any impact on the product as 20dBm CW both the operating max and Abs max for terminated port both in operating max and Abs rable Ratings table	
 This is a notification to advise our customers that from FCI. There will be no change in form, fit and fur During the transition from current site to new bump shipments with inventory built at either facilities and availability. Maximum power into termination Current datasheet has Pmax for terminated port set condition.
